

# Accessibility Resources for People with Visual Impairments

## An App For That

Apps are empowering people with visual impairments in ways we could once only dream of. They read text on the go, identify people, products, places, turn cameras into magnifiers, summon live help, and light the way.

- **Seeing AI** (Microsoft)- Free in the App Store **Reads Short Text, Documents, Products, People, Scenes**
- **KNFB Reader**- \$99 in the App Store **Text to Speech and much more in over 20 languages**
